

KE Relay Ordering Information

Standard Motor Protection Relay Kits

About

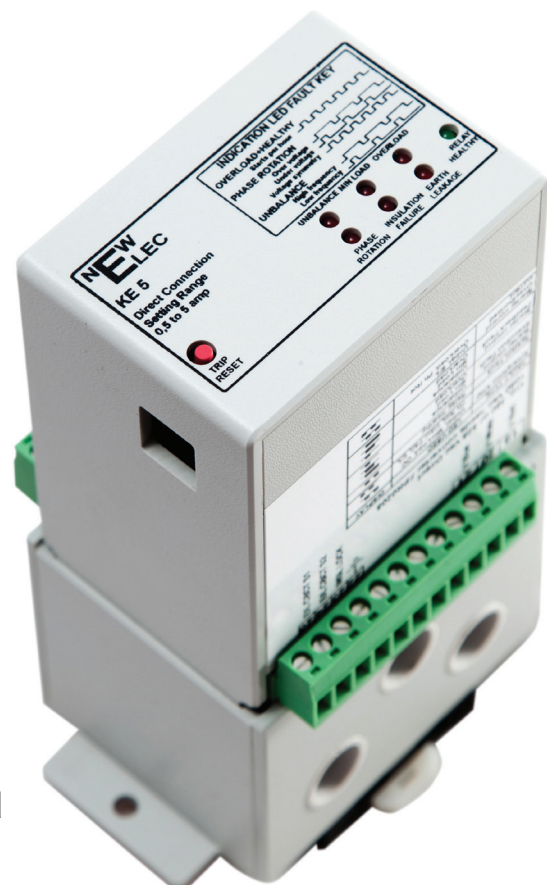

A comprehensive low voltage Electronic Motor Protection relay encompassing new and unique features. Designed for conveyor, compressor, crusher, fan and pump motor protection, these relays boast a wide range of user-selectable protection features.

Easy to setup via a man-to-machine interface or via computer with free setup software, the userselectable settings are a pleasure to work with.

Thermal overload, earth insulation lockout, earth leakage and short-circuit protection, along with frequency and power factor measurement, are just some features which, combined with the 2000 event records and 60 last fault records, make this a worldclass protection relay. Accessories include a door-mounted KD-FLED unit for indication, a Remote Programming Unit (RDU-420) and a portable HMI unit with infrared link.

Protection Features:

- Thermal Overload Protection
- Locked Rotor Protection
- Running Stall / Jam Protection
- Vectorial Stall Detection
- Unbalanced Current / Single Phasing
- Minimum Load / Underload Protection
- Earth Leakage /Earth Fault Protection
- Short-Circuit Protection
- Starts per Hour Limitation
- Over / Undervoltage / Phase Rotation
- Over / Under Frequency Protection
- Insulation Lock-out
- 2000 Event Recording
- 60 Last Fault Records
- 3-Phase Current Recording
- On-Board Simulator
- Profibus Communication
- Full Load Current, Minimum Load and Min Load Reset done on the Front Panel

A South African Company to be Proud of

Complete Motor Protection Solution to Suite :

0.12 – 0.25 KW Motor

Standard Kit
