# Electronic Motor Protection Relay Kits

### About

The UCR 80 electronic motor protection relay monitor one phase of a 3 phase motor through a 1Amp secondary input from a current transformer. Equipped with one main trip contact which energises after a user selectable time delay and one instantaneous changeover contact which energises upon detection of the fault.

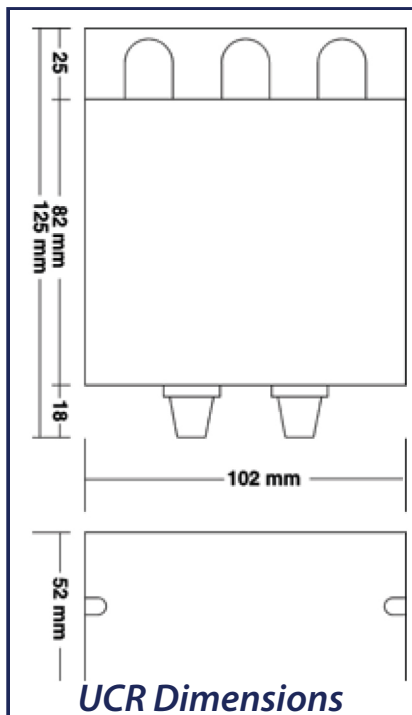

## Complete Motor Protection Solution to Suite :

### Protection Features:

- The NewElec UCR 80 is able to prevent problems related to:
- Blocked delivery or loss of prime in pumping applications
- Conveyor belt installations where they are running idle, or couplings break
- V-belt slippage or blocked filters on ventilation fans
- Drop in efficiency due to pump impeller wear

### Undercurrent related problems:

### Undercurrent related problems:

### Standard Kit

Product Code	Description
FPR0012	UCR 80 MC/S

The UCR 80 electronic motor protection relay monitor one phase of a 3 phase motor through a 1Amp secondary input from a current transformer. Equipped with one main trip contact which energises after a user selectable time delay and one instantaneous changeover contact which energises upon detection of the fault.
